

# “Caffiderm™ keeps me going all day and all night!”

– Ed Casnick, Construction Worker

Life is getting busier and busier. If it weren't for caffeine, you probably wouldn't make it through the day. The problem is, traditional methods of getting your caffeine fix don't last. Every hour or so you have to go back for another cup of coffee, another cola, another quadruple espresso. Not to mention another trip to the bathroom. And if you miss that dose, you crash!

Thanks to the Caffiderm™ patch, you don't need to miss out on a single, solitary moment of glorious caffeine goodness. That's because one Caffiderm patch releases a steady stream of caffeine into your bloodstream for up to 24 hours.

You'll never feel tired or cranky again, because you're getting the caffeine you crave without all the peaks and valleys associated with coffee. Cramming for exams? Not a problem! All-nighters are easy. Students have gone entire semesters without sleep thanks to Caffiderm.

Need some extra cash? Take on a second or third job! With Caffiderm, you can work 18 hours a day and still have time for the kids! Organize your CDs, read War and Peace, visit with friends, or work out. Time is no object when you can stay awake indefinitely!

Think of the benefits! No more falling asleep during boring meetings. Race other drivers during the morning and evening commutes. Now that you have the Caffiderm edge, you're unstoppable!

Still like coffee? Not a problem! Drink a cup or two for an extra boost. You'll be surprised how much you can get done when you're moving as fast as a hummingbird.

Caffiderm comes in three dosages, so you can choose how active you need to be:
