

## Noooooo!

Another friend, acquaintance, or co-worker, (or friend of an acquaintance of a co-worker) wants help buying a PC. **You know what's next.** The long phone tutorials explaining the difference between memory and hard drives. The endless search through advertisements, trying to find them the best deal. The obligatory, **"Why don't you come over and set up my PC and you can have dinner with us and the kids!"** ordeal. After all this, you're enlisted as their **Tech Support Is Only A Phone Call Away Friend For Life.** The problem is, there's just no polite way to say **No Way Seeya Later Buckaroo Not In This Lifetime!**

That was, until **Chuck.** Tell your newfound "friend" that you're busy, but that your friend Chuck is really good at this stuff, and he'll be more than happy to help. **Then hand him one of our prepaid Chuck cards.** One of our representatives in your area will take care of everything -- model selection, setup, dinner with the family -- **even support calls in the wee hours of the night.** Your buddy is none the wiser, and suddenly you've got lots of free time on your hands!

Call **1-800-00CHUCK** and order yours today!
