

Any Time is a Great Time for Cylindrical Meat!

Poor Mary! If Only She Knew About Cylindrical Meat!

If Mary had known what a great budget trimmer sausage and other cylindrical meats can be, she wouldn't have put her family into debt. If only she had known that a filling kielbasa costs only pennies per serving! Perhaps her husband wouldn't have felt the need to rob that gas station. Is it her fault that she's living in a flea-infested flophouse, her husband is in jail, and her children are wards of the state? You decide!

Unexpected Guests? Serve Cylindrical Meat!

One of the great things about cylindrical meat is that it's so easy to prepare! Have some sausage at breakfast, a hot dog at lunch, and bratwurst for dinner. Cylindrical meat goes down easy, because it's just the right shape to sliiiiide through your intestines, even if you don't chew.

It's Healthy!

Cylindrical meat is loaded with salt and preservatives, the very ingredients that keep foods fresh and tasty after years in storage. Those same preservatives will help to keep you looking young and spry clear into the next century. Best of all, your heirs will save loads of money on embalming!

It's Versatile!

Cylindrical meat can be cooked in so many ways! Boil it, grill it, deep fry it! It always tastes great. For a special treat, put 2 parts sausage and 1 part ice into a blender for a frosty sausage shake. Your hubby will think that you're the cat's meow!

Sammy the Sausage says

that cylindrical meat isn't just tasty, it's fun, too! Ask your grocer about the great backyard games like "Hot Dog Hunt," "Pokey Pepperoni," "Hop Over the Sausage," "Who Cut the Kielbasa?" and "Hide the Salami."
